Lecture 3

24/10/2024

to create group → groupadd

to add users to group → sudo usermod -aG friday noha

group name user

* sudo group mems friday ⇒ shows if any users are subscribed as secondary group

* sudo groupmod -g 6666 friday ⇒ change group ID

* sudo chage -l weekend

↳ All data about that user

* su weekend -c date

Switch user Command do this in weekend then return back

who

- ↳ who open the terminal tty
- ↳ who login

whoami

- ↳ active user

 ls -ld d3

sudo chown weekend abc → change owner

sudo chown : weekend abc → change group owner

 sudo

ls -l → read & execute

* change group *
* * * * *

ls -ld ⇒ permissions in file not all

w → 2
read → 4
execute → 1

* bash shell script *
